🎓 EDUCATION

Software Bootcamp
full-stack web development

General Assembly

📅 Dec 2024 - Mar 2025

Cyber Security Certificate

Google

📅 Feb 2024

Hospitality Management

University of Nevada, Las Vegas

📅 Aug 2010 - Aug 2017

★ SKILLS

- Languages & Frameworks: JavaScript, HTML, CSS, React.js, Node.js, Express.js, Python, Django
- Databases: MongoDB, PostgreSQL
- Tools & Platforms: Git, GitHub, VS Code, Postman, Netlify, Heroku, Canva, Photoshop, Final Cut Pro
- Other: REST API, JWT Authentication
- Languages: Fluent in Korean and English

🏆 ACTIVITIES

- Young Adult Board Member, Korean Church of Queens (2022 - Present)

📄 CAREER OBJECTIVE

I'm a software engineer with a background in hospitality, passionate about crafting intuitive, user-centered web applications. With a sharp eye for detail and a service-first mindset, I create digital experiences that go beyond function to deliver meaning. At the intersection of empathy and technology, I aim to bring comfort and clarity through every interaction.

👤 WORK EXPERIENCE

Software Engineer Fellow

General Assembly

📅 Dec 2024 - Mar 2025

📍 Remote

- Successfully completed a 12-week immersive software engineering program, mastering JavaScript, Python, and hands-on project development.
- Developed and launched 4 full-stack applications, enhancing user engagement by 30% through seamless front-end and back-end integration.
- Collaborated in Agile teams to enhance code quality, leading to a 20% reduction in bugs over three projects.

Barista / Training Manager

Coffee Monster

📅 Aug 2021 - Aug 2023

📍 Flushing, NY

- Managed inventory and trained new staff, improving team efficiency.
- Delivered consistent customer experience and handled fast paced service operations.

Tour Guide

Las Vegas Mania

📅 Jan 2017 - Mar 2018

📍 Las Vegas, NV

- Led tours across Las Vegas and Grand Canyon, delivering engaging presentations.
- Developed strong communication and organizational skills.

❤️ PROJECTS

Soccer League Simulator

Django | Python | PostgreSQL | JavaScript | HTML/CSS

- Created a soccer league simulator web app that allows users to select 19 teams from top European leagues and simulate a season.
- Developed custom logic in Django to generate match results, standings, and league tables.
- Implemented CRUD features for user created players.
- Utilized PostgreSQL for persistent data and efficient querying.
- Designed a responsive UI for team selection and dynamic season progression.

Learning Tracker App

React | Express | MongoDB

- Developed an app for users to log and visualize their study sessions.
- Integrated interactive charts to display progress using Chart.js.
- Focused on clean UX and mobile-first design.
